EXPERIENCE

User Experience Society (Jun 2016-May 2017)

associate director for user research

- researched for all paid projects from clients of the organization, providing support to the creation of the user experience of the products
- made articles on Medium about varied topics. One received a reach of 2.7k and a read ratio of 43%
- taught five underclassmen about analysis methods useful in marketing, user experience, IT and project management. They won a competition on IM
- critiqued, analyzed, and proposed designs about the school's student gov't's website, and the enlistment system

Manly Plastics Incorporated (Oct 2016-May 2017)

project manager for north star solutions

- led a team of five to reengineer a customer inquiry management system with the goal of indirectly increasing sales and speeding up decision support
- created the user interface and flow of the system based on numerous interviews and iterative testing
- increased support for decision-making by speeding up report generation from a minimum of 3 hours to a 5 second average

Burger King Philippines, JFC (Jan 2017-Apr 2017)

independent branding consultant

- analyzed the brand positioning and performance of Burger King in the Philippines with a team of five and provided a recommendation to the management on how to do better

Blogapalooza (May 2016-Nov 2016)

business development associate

- led a research effort to better understand the influencer market
- used insights gathered from the research effort to suggest features and functionalities for a B2I platform called BuzzIn
- crafted a brand image, designs, pitches and a pitch deck in preparation for BuzzIn's Grand Launch

EDUCATION

Ateneo de Manila University (2013-2017)

BS management information systems, specialization in data sciences, minor in management

- graduated on May 2017

MY RESEARCH PROCESS

- Gather data through interviews, stratified surveys
- Analyze data for insights using models
- Identify the problem through the insights and data
- Create possible solutions and enact the best fit solution
- Test and Iterate
